

## People near or handling clothing with Novichok may fall ill.

If a person is wearing clothing where Novichok is applied, will persons near him fall ill? Will people who handle the clothing fall ill?

Yes, people who are near a person wearing clothing with Novichok on it may fall ill, as Novichok is highly toxic and can be easily absorbed through the skin. Additionally, people who handle the clothing may also fall ill from coming into contact with the agent. To prevent this, the clothing should be removed immediately and washed or discarded [1]. Additionally, everyone in the vicinity of the person wearing the clothing should be given protective equipment to prevent any contamination [2].
